

RXG Systems Announces Release of **Elite Mail Server™** 1.0 for November 1, 2003

Atlanta, GA – September 3, 2003 – RXG Systems, LLC (www.rxgsys.com) today announced the release of **Elite Mail Server™** 1.0 for November 1, 2003. **Elite Mail Server™** is a low cost, high performing plug-and-play email server appliance, perfect for small/medium size businesses.

Elite Mail Server™ combines both the software and hardware necessary for a complete corporate email solution. Ease of setup, administration, maintenance and unlimited users are key selling points. RXG Systems offers pre-configuration at no cost as well as a complimentary maintenance/support plan for one year. **Elite Mail Server™** features include:

- Standard POP3/IMAP Accounts
- SMTP Relay with Access Control
- WebMail with Calendar
- LDAP Based Address Books
- Shared Folders via IMAP and WebMail
- Aliases (forwarders)
- Auto Responders
- Anti Spam/Anti Virus Controls
- Web Updates
- Administration through Secure Web Interface
- LCD Panel for easy initial setup and ongoing status

In addition to **Elite Mail Server™** RXG Systems has also developed a unique service called **Elite Backup™**. This is an add-on feature to **Elite Mail Server™** used to backup data stored on the **Elite Mail Server™** system. Backups occur on a nightly basis over the internet. No user intervention is required.

"Many companies are wasting time, money, and resources on outsourced or high priced internal email solutions" said Ray Hall, President of RXG Systems. "Prior to **Elite Mail Server™**, a small company with a small or no IT staff had two choices: pay an ongoing monthly fee as well as deal with the hassles and inflexibilities of outsourcing or purchase expensive user-based software and hardware. **Elite Mail Server™** is the smart alternative email solution"

"**Elite Mail Server™** encompasses the latest technology, software and hardware" says Graham Wooden, Vice President of Development of RXG Systems. "By harnessing the stability of Linux, **Elite Mail Server™** is rock solid giving the edge and growth our customers should demand from such a product."

RXG Systems is currently pursuing strategic alliances with Internet Service Providers, Software/Hardware Distributors, and IT Consultants throughout the United States. To contact RXG regarding such an alliance, please contact info@rxgsys.com.

About RXG Systems

RXG Systems, LLC is a privately held Atlanta based company. RXG Systems' development staff has more than 15 combined years of experience in internet technologies and application development. Our mission is to provide high quality IT solutions for companies with little or no technical support staff. Our solutions are designed for efficient and easy administration, scalability, reliability, and cost effectiveness; this is why **Elite Mail Server™** is the *smart alternative* email solution.
